n

Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           Conservative
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            /dev stage="adult"
/lab_host="Epicurian Coli (TM) XL-10-Gold"
/clone lib="Chimpanzee brain library Koos"
/clonetor: pUChi; Site_1: Sfil-A; Site_2: Sfil-B; The
library was prepared using the SMART cDNA library
construction Kit (Clontech), doing only primer extension,
but not PCR amplification of the cDNA. The only deviation
from the published protocoll was that we cloned the cDNA
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             Paabo
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      /sex="male"
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           1. .605

Denatured RNA was size fractionated on a 1% agarose gel. First strand cDNA synthesis was primed with oligo-dT primer containing a Not I site. Double strand cDNA was size selected according to mRNA size fraction, ligated with EcoR I adaptor, digested with NotI and then cloned directionally into pYX-Asc vector. The library tag sequence located between the Not I site and the polyA tail is CGAACTGAAT. This library was created for the University Iowa Hrain Anatomy Project (BMAP): 'Gene Discovery in the Developing Mouse Nervous System', supported by National Institute of Mental Health (NIMH), Hemin Chin, Ph.D.,

(CEDA-) CEDARS

SINAI HEALTH SYSTEM. 98US-0082007P

P-PSDB; AAY32154.

1999-633829/54.

16-APR-1998;

This is the nucleotide sequence of full-length cDNA corresponding to a novel human SH3 gene, termed the SH3DIA gene, that contributes to the development of platelets and the pathogenesis of leukaemias, both in general and in particular those involving the megakaryocytic lineage.

The

Nucleic acid from the human SH3D1A gene and its products, useful for the diagnosis and treatment of myeloproliferative disorders and leukemia.

Claim 2; Fig 5; 99pp; English.
